Solar Gard® Solar Window Film: Reference

Solar Gard® 4 Mil Graffitigard (Brussels, Belgium)

Solar Gard offers protection against vandalism

Brussels main transportation hub protected with easy-to-replace glass protection film

Project Information

Location: Brussels EU quarter, Belgium

Problem: Vandalism

Solution: Solar Gard® 4mil Graffitigard, 2000m²

Dealer: Proglass, Solar Gard Premium Partner. Visit: www.proglass.be

Year of installation: 2016

The Schuman train-, bus- and metro-station is the main transportation hub in the heart of Brussels European quarter, home of the President of the European Council and the HQ of the European Commission and Parliament.

After a multi-million renovation project, the glass was being damaged by vandalism every day; graffiti paint, scratches and acid "etch" attacks.

2000 m² of Solar Gard 4mil Graffitigard was applied to protect all the glass on the platforms, information screens, shops, balustrades, etc...

Kris Vroman, founder of Proglass Belgium: "This extremely strong film offers a layer of protection for the glass. Criminals cannot damage the glass any longer and we can easily replace damaged film so the window pane does look clean again".
