

Product Code	Series	Colour	Gauge	Construction
SF BR MT 35 PS	SPECIALITY SERIES	BRONZE MATTE PRIVACY	50µ (2Mil)	2PLY

### Performance Fenestration Data

Visible Light Transmission	35%	Glare Reduction	61%
Visible Light Reflection (Internal)	7%	Solar Heat Gain Rejection	32%
Visible Light Reflection (External)	7%	Total Solar Energy Rejected	33%
Solar Energy Transmission	55%	Shading Coefficient	.77
Solar Energy Absorption	39%	Solar Heat Gain Coefficient (g value)	.69
Solar Energy Reflected	6%		
Ultraviolet Rejection	>99%	U-Factor	1.14
		Emissivity	.86

**A patented superior scratch resistant coating is featured on all SolarTek Window Films**

### Unique Products for Specialised Applications

SolarTek Films distributes a full line of Speciality window films for a wide range of applications and unique needs. These include coloured, decorative and textured films created to address specific environmental challenges, usually in commercial applications such as privacy, decoration and heat control.

#### Key Features & Benefits

Reduces Heat Gain – Reduces Energy Usage  
 Reduces Eye Strain – Increases Comfort Levels  
 Protects Against Fading – Blocks UV Rays  
 Increases Visual Privacy  
 Visual Enhancement – Improves Aesthetics

#### Obscure Frosted Privacy Window Films

Suitable for application to windows, partition glazing, glazed exteriors, structural glazing, curtain walling, roof-lights and atrium glazing to effectively and economically reduce the problems associated with visual privacy. There are a variety of grades available offering different light level performances and colour choices to best meet your needs.

### Speciality Series Window Films

Also in White, Silver and Grey Matte window films when privacy is desired without blocking light. Other window films in the Speciality Series include Black-Out window film and White/Black Black-Out window film for the highest level of privacy. Countless application possibilities and strong factory back warranty coverage.
