

DATASHEET

SOLARTEK NIGHT VIEW

PRODUCT SPECIFICATION

RANGE: NIGHT VIEW

VARIANT: LIGHT

SHADING COEFFICIENT: **0.45**

'U' FACTOR: **0.99**

EMISSIVITY: **0.75**

FILM COLOUR: **LIGHT**

FEATURES & BENEFITS

Get better sight at night; ideal for Petrol Forecourts, Security Huts, Boats and Residential Homes

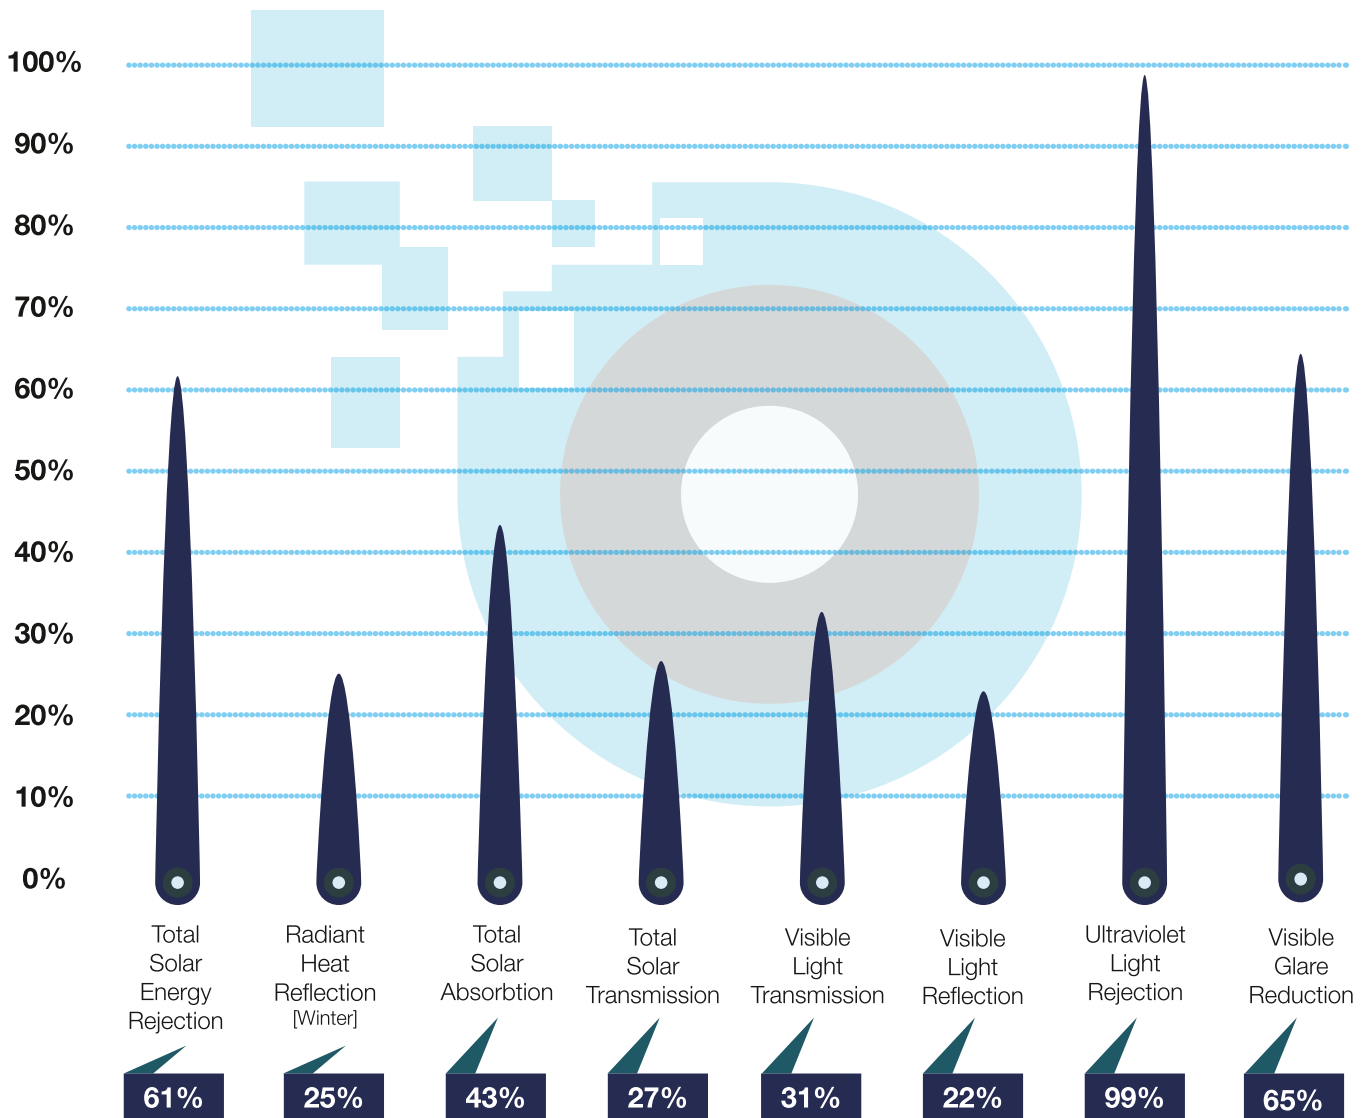

Night View window films help block the sun's UV rays, reduces glare and rejects the sun's heat.

These films are designed to reject solar heat that is produced from visible light, while providing significant glare relief.

Films allow the reduced natural light into rooms by day, and thanks to a low interior reflectivity, you can still enjoy the view out by night.

Higher exterior reflectivity means you can enjoy enhanced privacy with your windows both day and night.
